DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on January 7, 2008 has been entered.

Specification

2. The disclosure is objected to because of the following informalities: paragraph [0075], line 7, "which the noise" should be "which removes the noise". Appropriate correction is required.

Claim Objections

Claims 1, 3-8, 10-13 and 21-27 objected to because of the following informalities:

In claim 1 (line 14), claim 8 (line 12), claim 13 (lines 13-14), and claim 24 (line 11), "the phrase "pilot signal" should be "extracted pilot signal".

In claim 3, lines 2-3, the phrase "wherein said dechannelization unit comprises:" should be deleted since "the delay element) 216 shown in Figure 6 is not part of the

dechannelization unit; line 4, "delay element" should be "a delay element"; and line 5, the phrase "by said time interval" should be deleted since "the time interval" is $\frac{1}{2}$ chip while the time interval of the delay element is one chip.

In claim 4, line 2, the word "adjustor" is misspelled; lines 3 and 4, "said first" should be "said descrambled first"; and line 4, "complex conjugate multiplier" should be "a complex conjugate multiplier".

In claim 10, lines 2 and 3, "sequence" and "said time interval" should be "sequence by a Walsh sequence generator" and "a delay element", respectively.

In claim 21, line 3, the phrase "by said fixed time interval" should be deleted.

In claim 21, line 4, "said orthogonal" should be "a delayed orthogonal".

In claim 22, line 1, "said first" should be "a delayed first".

In line 3 of both claims 23 and 27, the word "fixed" should be deleted.

In claim 25, lines 2 and 3, "sequence" and "said fixed time interval" should be "sequence by a Walsh sequence generator" and "a delay element", respectively.

In claim 25, lines 3-4, "said orthogonal" should be "a delayed orthogonal".

In claim 26, line 2, "said first" should be "a delayed first".

Claims 5-7 are objected to because they depend either directly or indirectly from the independent claim 1.

Claims 11 and 12 objected to because they depend directly from the independent claim 8.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 24-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The new claims 24-27 recite a computer program product comprising: a computer-readable medium comprising code for causing at least one computer for performing the steps raise the matter of new matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Although the specification described that the microprocessor 130 shown in Figure 4 in the receiver could be used to determine the shape of the fat path and would be adjust the values of delay elements in accordance with the shape of the path grouping. See paragraph [0069]. The specification fails to describe what is the computer program product comprising: a computer-readable medium comprising code for causing at least one computer for performing the steps as recited in new claims 24-27.

Allowable Subject Matter

5. Claims 1, 3-8, 10-13 and 21-23 would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Odenwalder relates to a method and apparatus for high data rate CDMA wireless communication.
